Ashe Plantation Phase II Upgrades - Re-Advertisement for Bids

The Project consists of the demolition of the existing 0.1 MGD "packaged" WWTP (flow eq, sludge holding, extended aeration, clarifiers), filters, generator, shed and select yard piping. The new infrastructure includes a new 0.1 MGD "packaged" WWTP (flow eq, sludge holding, extended aeration), two clarifiers, pre-engineered office/lab building, generator and the associated yard piping, site work, electrical and instrumentation. This scope of work also includes the relocation of and existing 8" gravity sewer line.
