Automated Traffic Signal Performance Measures (ATSPM) Cloud Services

The City of Charlotte (City) strives to improve arterial operations and enhance safety at signalized intersections throughout the City by deploying an Automated Traffic Signal Performance Measures (ATSPM) system. The City is seeking to procure a commercially available, off-the-shelf ATSPM system to connect to all online signalized intersections (~780 intersections). Additionally, the City is looking for a partner that would be willing to work with the City to develop a performance metric to track the success of our Signal Control Priority citywide for our emergency vehicles and transit vehicles to help track performance of the system.
