Automatic Lighting Controls Maintenance and Services

The proposed contract is to provide installation, maintenance, and programming services for Automatic Lighting controls in City facilities that are not part of an integrated Building Automation System. All control systems require maintenance and confirmation that they are still functioning correctly. Lighting controls may include occupancy sensors, timelocks, and photocells, relays, light control switches, or touchscreens. Lighting control systems should be inspected and cleaned to ensure proper operation. Reporting of deficiencies, troubleshooting, and programming modifications may be needed.
