Baggage Handling System Control Room Relocation

The project involves the interior upfit of approximately 2,000 square feet of existing shell space on the baggage level of the main terminal at CLT Airport, including a baggage handling control room, support space, and a break room. The predominant work will consist of typical finishes such as drywall, ceilings, flooring, mechanical, electrical, plumbing, and fire protection. The duration of the project is expected to be approximately four to six months. Most of the work will occur during the day, with material delivery and debris removal taking place at night.
