

Charlotte Water / Construction

Belmont Horizontal Directional Drilling Construction

This project will deliver a new lift station and force main to convey wastewater flow from the City of Belmont to Charlotte Water's (CLTWater) Stowe Regional WWRF via CLTWater's Paw Creek Pump Station. This project will allow the existing Belmont Wastewater Treatment Plant to be decommissioned and eliminate the need for costly improvements at This facility. Due to separate funding sources, the project will be delivered via Design-Bid-Build delivery method through two phases of Design and three separate construction contracts.
