CLT VoIP Migration

The primary goal of this project is to upgrade the existing telecommunications infrastructure at the airport from copper Plain Old Telephone Service (POTS) lines to a more advanced, efficient Voice over Internet Protocol (VoIP) system. This transition is aimed at addressing the current limitations of the outdated system, which include lack of modern communication features and inefficiency in handling the airport's operational demands.

Details

Posting Number	2026-Q1(Jan-Mar)-AVI-17322
Anticipated Posting Date	2026-03-31
Commodity Code(s):	28029, 90684, 91579

Requirements

Last Updated: 01/26/26
