Copy of Hidden Valley Fire Station #45

Design and construct a new 2-story, 3-bay fire station approximately 14,000 square feet, to be located at 5800 North Tryon Street. This facility will be a new infill fire station that will alleviate high call volume for surrounding stations. A new fire station must be built when a new “point of dispatch” is required in order to meet response time standards. The proposed facility will be located on a 2.03-acre parcel that facilitates the redevelopment of abandoned/underutilized sites and vacant sites. This location and site selection shall meet the *City of Charlotte Policy for Sustainable City Facilities* and *Charlotte Fire Department Facilities Master Plan*. This project will pursue LEED certification. The site will incorporate solar panels and a geothermal well system with water source heat pumps.
