Design, Implement and Maintenance Services for a Content Management System (CMS)

Company is responsible for designing, developing and maintaining the approved web and mobile application. The website should consume content and web assets from the Content Management Database (CMDB) similar to the function of a headless web Content Management System (CMS). The mobile application will also consume content from the CMDB. The content will be created and editable in the CMDB and accessed via a feed or API to the front-end website and mobile application.
