Digital Asset Management System

The City is seeking Proposals to implement and support a Digital Asset Management System to be used by multiple City Departments. The System will, at a minimum, store and manage all creative assets – photos, videos, graphic design in addition to supporting brand marketing. The system will need to function similarly to a working library and will have the ability to share historical content, current content, and details on the intended use. This system should also allow other users within the department to easily find and distribute approved content.
