Department of General Services / General Services

Electrostatic Painting Services

The City of Charlotte is requesting proposals for electrostatic painting services. These services may be used in firehouses and other General Services-maintained facilities. Requested services include the complete cleaning, resurfacing, and recoating of doors, walls, and other items. Prospective vendors must have extensive experience with electrostatic painting, and preferably in the context of delivering services to local government entities. It is imperative that any potential contamination is contained, and prospective vendors must clearly demonstrate their approach to preventing overspray in workspaces. The City anticipates selecting a single vendor for an award but reserves the right to select multiple vendors should the need arise.

Details
