Charlotte Water / Architectural / Engineering Services

Interbasin Transfer Modification Project

Charlotte Water is soliciting Statement of Qualifications from a qualified engineering firm to conduct a comprehensive environmental impact assessment and prepare an Environmental Impact Statement (EIS) in accordance with applicable regulations and guidelines. The scope of work shall include, but is not limited to, identifying scope alternatives that would provide for long term water supply to the Rocky River portion of the CLTW service area. Also, identifying potential environmental impacts, including secondary and cumulative impacts associated with the proposed IBT modification and identified alternatives. The selected Firm shall have relevant experience in developing Environmental Impact Statements (EIS) within the realm of water resources, supply, and use. Preferably the Firm will have experience in development of EIS related specifically to interbasin transfer of water related to the regulatory requirements of North Carolina Department of Environmental Quality (NCDEQ).

Details
