

Charlotte Department of Transportation / Architectural / Engineering Services

ITS Design Services On-Call

This request is to contract with professional engineering consulting firms to provide professional engineering services for Intelligent Transportation System (ITS) projects. These projects are part of Charlotte Department of Transportation's (CDOT) ITS Master Plan and are critical in their efforts to upgrade and expand the traffic signal system network in the city. The professional services include but are not limited to development of fiber optic cable routing plans, utility make-ready plans, fiber optic cable splice details, traffic surveillance cameras, engineered project specifications, and construction cost estimates. The services may also include developing traffic signal plans per CDOT and NCDOT standards, coordination of the utility make-ready work and assistance with the project administration and inspection during construction. The services may also include grant consulting services that may range from developing proposals, overseeing implementation and performing construction administration and inspection per state and federal guidelines and standards. These contracts may have local, state, or federal funding.
