Charlotte Department of Transportation / Construction

ITS Miscellaneous On-Call Construction

This is a three-year contract with the Charlotte Department of Transportation (CDOT) City's Intelligent Transportation System (ITS). The contract will include repairing or relocating conduit, fiber, aluminum poles, traffic management cameras, and other facilities throughout the Charlotte service area. There may also be small project work not related to repairs. The Superintendent may be required to respond and be on-site within 3 to 6 hours. They will be expected to evaluate the conditions and develop an agreed-upon plan with the city. While it is anticipated that the majority of the work will be able to be performed during normal working hours, there may be instances where overtime work is needed, or work on nights and/or weekends or holidays. Separate pay items have been included to cover these instances. Due to the urgent nature of some of these repairs, work in inclement weather may be required.
