

Charlotte Water / Construction

# Mallard Water Reclamation Upgrades, Phase 1 Improvements

The Phase 1 Water Reclamation Upgrade will increase the capacity of the facility to 14.9 million gallons per day (MGD) and includes a new deeper influent pump station to accept flow from a new, deeper trunk sewer, flow equalization, influent screens, aeration control and chemical feed. The estimated construction cost for this upgrade is \$65.2 million. The Phase 1 construction project will also include solids improvements that are estimated at \$24 million. Both aspects of the project will be delivered together as a single construction project.
