Material Testing and Special Inspection Services

The successful respondents shall provide geotechnical and material testing services for projects initiated by the Airport. They shall conduct general material testing tasks in accordance with industry accepted standards and practices as well as the requirements of the airport, the Federal Aviation Administration, North Carolina Department of Transportation and City of Charlotte standards. Examples of Federal Aviation Administration standards include but are not limited to P-401/403 (Asphalt) and P-501 (Concrete). Materials testing will be to independently verify site/material conditions to allow work to proceed with confidence. Material Testing services may also include construction observation, report writing and quantity measurements.
