Department of General Services / Architectural / Engineering Services

Miscellaneous Engineering, Urban Design and Grant Writing

This selection will consist of three separate types of work. The general scope of work for each generally includes:

Miscellaneous Planning and Design Services The miscellaneous planning and design services may be used for multiple projects and is anticipated to include the selection of multiple consultants. The projects have not been identified but may include intersection improvements, road widening, bicycle or sidewalk projects, trail projects, new alignment projects, traffic analysis, pedestrian safety improvements, structural design, advanced planning and/or feasibility work. Projects will range in scope and size.

Urban Design Services The urban design services may be used for multiple projects and will be a task order-based agreement. This selected consultant(s) will support the city by providing services that encompass planning, economic development urban design, historic preservation and placemaking. Projects will range in scope and size.

Grant Preparation Services The city has applied for various state and federal grants (SS4A, RAISE, etc.) and is looking for consultant(s) to provide assistance with grant preparation services for future applications. The selected consultants will be expected to lead the effort in coordination with city staff to provide all services needed to apply for various state and federal grants. It is anticipated that multiple consultants may be selected for this task.
