

Strategy & Budget / General Services

Municipal Services Districts Administration RFP

The City has defined and established five (5) Municipal Service Districts ("MSD"). These partnerships extend the City's capacity to address strategic priorities and concerns of the community, including but not limited to:

- Partnerships due to special legislation (such as tax allocations);
- Partnerships that support the City Council's five strategic Focus Areas for the City (Community Safety, Economic Development & Global Competitiveness, Environment, Housing & Neighborhood Development, and Transportation & Planning); and
 Partnerships that contribute to community enrichment.

The City is seeking a Company or Companies to provide Municipal Service District Services for each of the existing 5 MSDs. Companies may choose to propose for services on one (1) or more MSDs, and the City shall contract individually for each MSD with the Company best meeting the City's needs. Companies are coordinated by the Office of Strategy & Budget
