Charlotte Water / General Services

On-Call Engineering Support for Water Distribution System Modeling

The primary goal of this engagement is to maintain and update an accurately calibrated hydraulic model of the Charlotte Water distribution system using Innovyze InfoWater software. Selected firms will receive GIS data, and any additional available system information to support this effort. Typical services may include water system conveyance and capacity analysis, raw water or water reuse system hydraulic modeling calibration, system planning for current and future year scenarios, development of opinions of probable construction cost (OPCC).
