On Call Stream Restoration and Sanitary Sewer Repair

This project includes stream stabilization and sewer repair at multiple locations within the sanitary sewer collection system. Stream stabilization structures shall be constructed to protect existing and proposed sanitary sewer infrastructure. Project components include natural in-stream structures, plantings, site grading, sanitary sewer replacement, sheet pile installation, bypass pumping and sediment control measures. Site locations will be released during the contract duration. The contract is expected to be for a two-year term with possible renewal.
