Rail Tool Calibration

Requesting a solicitation for Rail Maintenance and Maintenance Wayside equipment calibration. Seeking competitive proposals from accredited calibration service's to provide repair and calibration services for test and measurement equipment. It is the desire of CATS Rail Operations to partner with multiple vendors for these services. Calibration of tools and equipment is a necessary part of the quality control process for CATS Rail Operations for proper maintenance of our railcars and rail infrastructure. Tools that have exceeded their calibration due date are taken out of rotation and noted as past the calibration due date. CATS Rail Operations is governed by our own internal calibration policy which is largely based on APTA standards. In compliance with our calibration policy, CATS Rail Operations sends out equipment throughout the year for calibration and/or repair utilizing various vendors and annually hosts an onsite calibration.
