Replacement of CharlotteNC.gov

Migrate charlottenc.gov content from the existing Sharepoint environment managed by RMSource/Azure to a new, modern hosted/SaaS Content Management System solution. Migrating the city's public facing website to an innovative content management system will provide more opportunities for accessibility, delivering a good user experience, and reducing the amount of time dedicated to managing content. Some other drivers are a need for high availability, scalability to meet peak demands, responsive pages to provide a good user experience for multiple media types, and more options for adding custom functionality to public facing pages The City will go through an RFP process. The RFP will be for the SaaS solution, and for migration/re design of the site content. The implementation process will be to migrate/re-design content from the City's Sharepoint Charlottenc.gov environment to the new CMS environment. It is expected to be a 6-12 month project. All departments will benefit from this project.

Details

Posting Number	2021-Q2(Apr-Jun)-IT-4848
Anticipated Posting Date	2021-05-27
Commodity Code(s):	92005, 92045

Requirements

Last Updated: 05/28/21
