Charlotte Storm Water Services / Construction

Storm Water Repair and Improvement FY2025 G

Work performed under this contract will consist of storm water infrastructure repair and improvement projects within the city limits of Charlotte, NC. Work will involve mobilization, earthwork, drainage structures, storm drainpipe systems, channels, working over, under, near, and around existing private utilities, asphalt paving, concrete flatwork, landscaping, and any associated work required by the Engineer. Other work may include structural foundation protection, storm water pipe lining, storm water pipe joint and structure repair, water and sewer relocations, installations and adjustments. Storm Water maintenance work may be located entirely within or a combination of the street right-of-way, private, residential, and commercial properties.
