

Charlotte Water / General Services

Water Transmission Line Easement Clearing Services

Charlotte Water will be seeking proposals for Water Transmission Line Easement Clearing Services. These services would potentially require heavy clearing of brush, including possible tree and stump removal, for properties in which access to water transmission line easements must be maintained by Charlotte Water. Service areas and boundaries will be identified by Charlotte Water. The selected firm or firms shall also be responsible for the removal and disposal of vegetation. Once initial clearing has been completed, scheduled maintenance clearing of the easements will be planned with a standard frequency.
